About This Game

Ninja Stealth III

Ninja Stealth III is a casual game with 30 challenging levels where your only goal is to get the computer inside the room, can you do it?

The Game:

- 30 new challenging levels
- New achievements
- Move inside the room without being detected
- Hide yourself behind the boxes
- Camouflage yourself as a box

-
- Have fun!

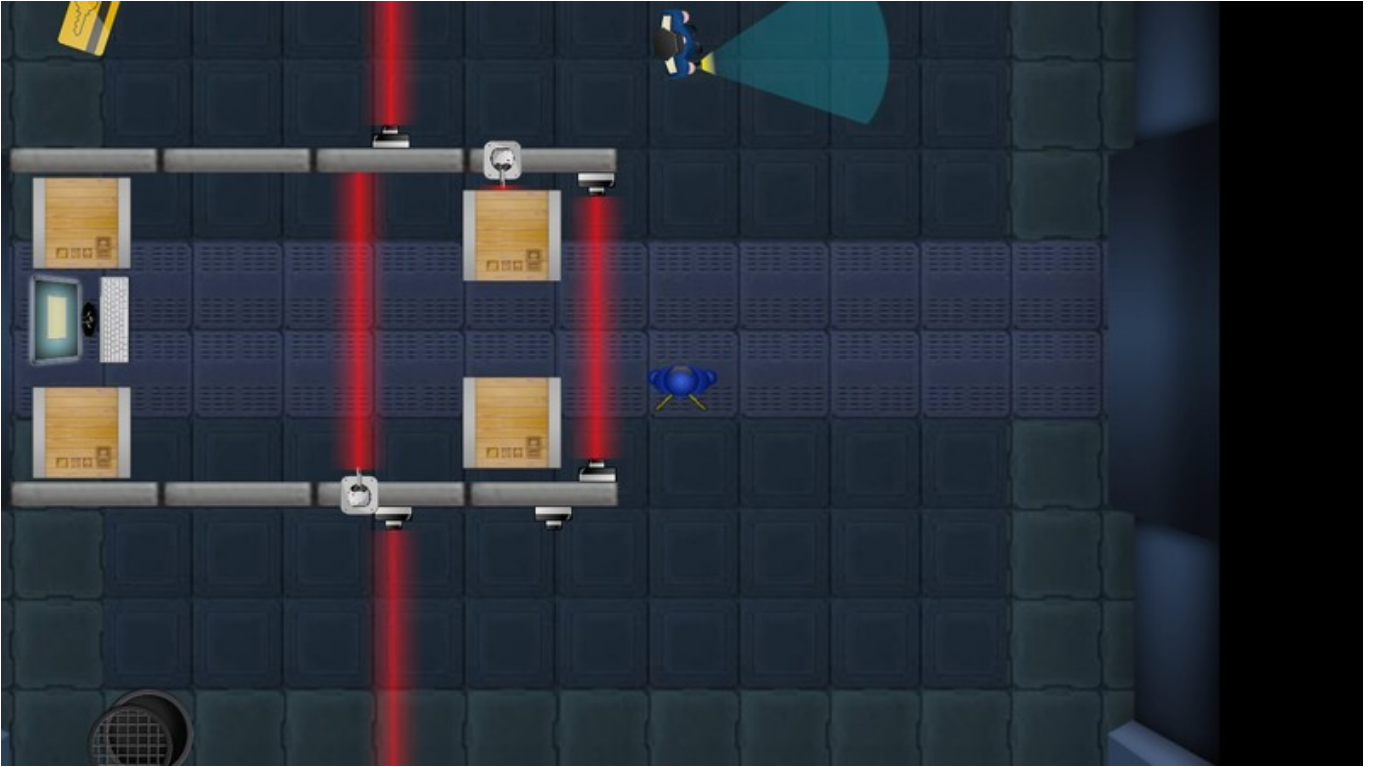

Warning:

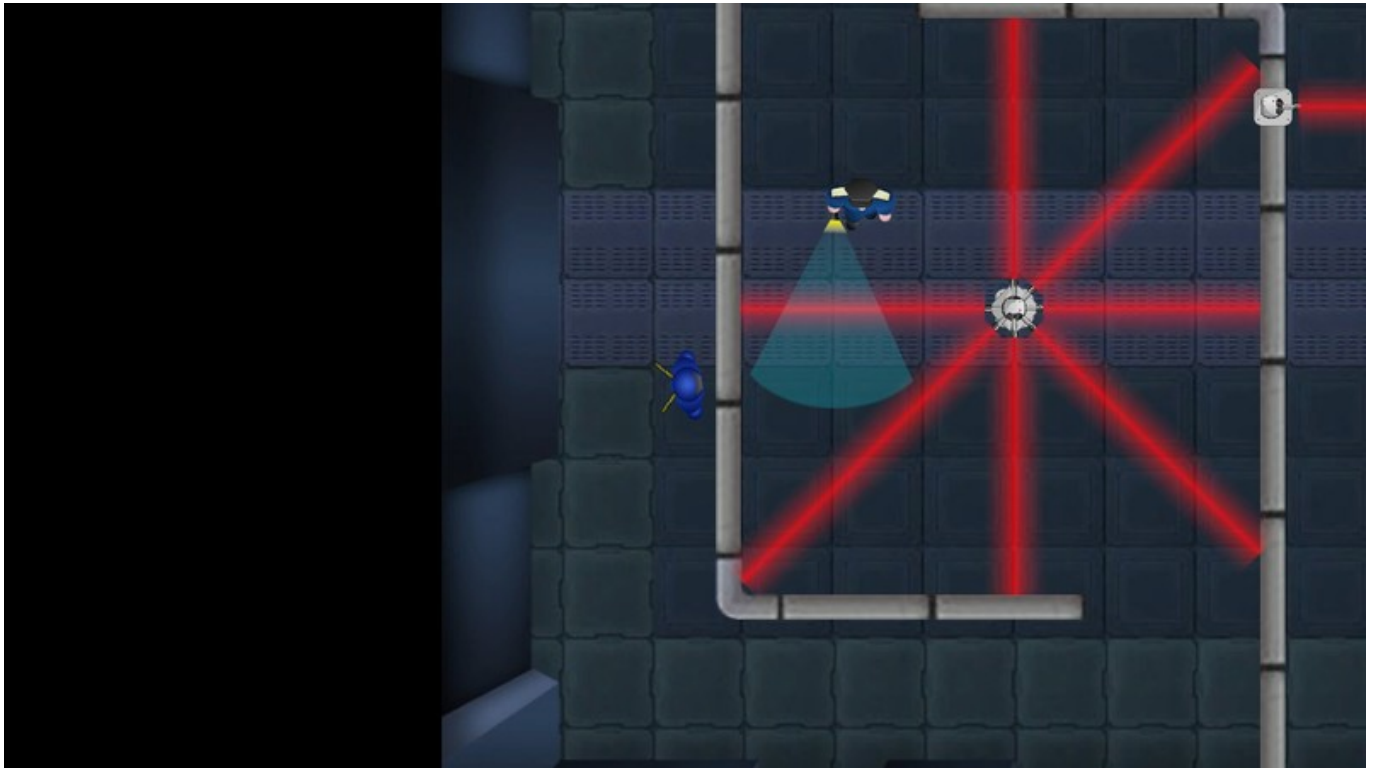

If you want an easy game or you can't deal with frustration, DO NOT buy this game!

Back to the original Unity designed game style, the controls can be changed now and plays more fluid.

The only reason I'm recommending this is basically 2 reasons:

- 1) Achievements for just screwing around in the game
- 2) It's a break from other online games which can get toxic after a while.

If you have the money to buy this on sale, then do that rather.
